

1.1 System Requirements

In order to successfully work with SGW, please make sure that you have the following:

- PHP version 4.3.x installed on your server
- MySQL database (<http://www.mysql.com>)
- Cron jobs functions on your server (make sure you have access to cron. If you host has cpanel, it's very easy to setup.)
- FTP access to your server and ability to change file permissions on your server
