

5. AUTOMATING THE SCRIPT WORK

In order for SGW to work automatically, only one cron job is needed to be setup on your server. We suggest that you set cron to run once a day. However it is possible to set it up differently, so it could run the script as often as you need.

Here is the screenshot of standard cron manager in cpanel at most of the Unix hosting providers:

Standard Cron Manager

This is a web interface to the crontab program. It allows you to run commands at any time you specify. Enter the command you would like to run as well as running times.

Please enter an email address where the cron output will be sent:

Entry 1

Command to run:

Minute(s):
Every Minute
Every Other Minute
Every Five Minutes
Every Ten Minutes
Every Fifteen Minutes
0
1
2
3
4

Hour(s):
Every Six Hours
0 = 12 AM/Midnight
1 = 1 AM
2 = 2 AM
3 = 3 AM

Month(s):
Every Month
January
February
March
April

Day(s):
Every Day
